LeetCode: [leetcode.com/singhsiddhartha220](#)

## SUMMARY

- Full Stack Engineer with hands-on experience in building scalable web applications using the MERN and PERN stacks (MongoDB/PostgreSQL, Express, React, Node.js). Proficient in designing schemas for both SQL and NoSQL databases. Proficient in optimizing frontend performance, designing RESTful APIs, and implementing real-time features using WebRTC. Passionate about system design, cloud integration (AWS), and secure coding practices.

## TECHNICAL SKILLS

- Frontend Development:** React, Next.js, Redux, Tailwind CSS, HTML5, Bootstrap, jQuery
- Backend Development:** Node.js, Express.js, Spring Boot, RESTful APIs, Socket.IO, WebRTC, Flask
- Languages:** JavaScript (ES6+), Python, Java, C++, SQL
- Databases & Cloud:** PostgreSQL, MongoDB, MySQL, AWS (EC2, S3), Vercel, Docker
- Developer Tools:** Git, GitHub, Postman, VS Code, Google Colab

## EDUCATION

- VIT Bhopal University** Bhopal, Madhya Pradesh  
*Bachelor of Technology - Computer Science Engineering* Aug 2023 - May 2027
- Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Web Technologies, Software Engineering, Operating Systems, Computer Networks

## PROFESSIONAL EXPERIENCE

- Sharkdom** Remote  
*Software Development Engineer Intern* May 2026 - Present
  - Frontend Optimization:** Optimizing a high-performance **Next.js** application to improve rendering speed, responsiveness, and frontend performance.
  - API Integration:** Integrating scalable backend APIs with frontend modules while implementing efficient state management and error handling.
  - Caching & Scalability:** Reducing redundant API calls using **Redis caching** and request optimization strategies to improve application efficiency.
- LucidLedger** Remote  
*Full Stack Developer Intern* Feb 2026 - April 2026
  - Tokenized eKYC Platform:** Built full-stack modules for a secure SaaS-based tokenized eKYC platform enabling reusable identity verification workflows.
  - Backend Engineering:** Developed RESTful APIs and microservices using **Spring Boot** and **Node.js** for secure onboarding systems.
  - Frontend Development:** Built responsive React.js interfaces for optimized remote-first digital KYC workflows.
- COSMIC365** Remote  
*Software Engineering Intern* Feb 2024 - Aug 2024
  - Full Stack Development:** Built scalable software modules using React.js and Node.js, reducing page load times by **30%**.
  - API Architecture:** Designed RESTful APIs and optimized middleware logic, improving server response time by **40%**.
  - Database Optimization:** Enhanced PostgreSQL/MySQL query performance through indexing, achieving nearly **2x** faster retrieval speed.

## TECHNICAL PROJECTS

- Real-Time Communication Platform** VirtuSync  
*Node.js, Express, PostgreSQL, Socket.IO, WebRTC* [Live Demo](#)
  - Low-Latency Architecture:** Engineered a video conferencing tool using WebRTC for peer-to-peer streaming, achieving **sub-200ms latency** for video transmission across distributed networks.
  - Scalable Signaling:** Implemented a custom signaling server using Socket.IO to handle concurrent room joins, supporting stable connections for multi-user meeting rooms.
  - Security Implementation:** Integrated JWT-based authentication and secure session management, preventing unauthorized access to private meeting streams.
- High-Performance E-Commerce Platform** Wyre  
*Next.js, Tailwind CSS, SQL, Server-Side Rendering* [Live Demo](#)
  - Performance Engineering:** Leveraged Next.js Server-Side Rendering (SSR) to optimize critical rendering paths, attaining a **Lighthouse Performance score of 95+** and boosting SEO visibility.
  - Optimized UX:** Built a responsive global cart system with optimistic UI updates, eliminating interface lag and reducing cart abandonment rates during checkout.
  - Modern Interface:** Designed a custom "Cyberpunk" themed aesthetic using Tailwind CSS, ensuring 100% responsiveness across mobile and desktop devices.

## CERTIFICATIONS & ACHIEVEMENTS

- Introduction to Machine Learning (NPTEL) - Validated understanding of algorithmic foundations.
- Solved **350+** Data Structures and Algorithms problems across various coding platforms (LeetCode, GeeksforGeeks).
